

CAN Hosted Telephony Business class voice communications

It is estimated that within the next three years more than 50% of corporate telecoms will run VoIP networks. Innovation, convergence and education have led to a greater understanding and demand for IP telephony and we are currently on the edge of an unprecedented increase in usage.

CAN Hosted telephony is a fully managed telephone system designed for small or large or multi-sited businesses. The system will take your business forward by providing all the powerful feature sets you would expect with added flexibility that will enhance the productivity and image of your business.

Some of the Key Benefits

- "Log on" for personal settings and features – Take your phone ANY where in the world!
- Web Portal Admin - an end to specialist support means easy additions, moves and changes
- Choice of cost effective IP phones, Soft phones, with integrated Outlook toolbar
- Shared features include: Voice mail, Hunt groups, follow me, simultaneous ring etc
- Options include - Reception console and Auto Attendant etc.
- In and out bound call statistics and monitoring
- FREE site to site calls
- Rental Model reduces capital outlay
- Reduced maintenance and total cost of ownership versus traditional PBX's

How does it work?

Dedicated IP phones or soft phones connect via your existing LAN to our hosted IP PBX and connected using CAN's Business class Broadband using Virtual Private Network technology. Broadsoft is our chosen carrier class platform and partner. The system is in use at over 3 million extensions worldwide, has full redundancy and is managed by CAN networks. If required the system will also integrate with your existing PBX.

Why should I buy this?

CAN Hosted Telephony offers the flexibility to grow and manage your business needs quickly and efficiently. It is easy to use and the right features and tools are at your disposal. Travel companies, sales groups, multiple site organisations such as the Public Sector or support companies are able to work together in the UK or anywhere in the World.

The system is easy to install and maintain and administrators are enabled for instant web based control with flexibility to add or remove features or extensions. Office based, mobile or Home workers are offered a flexible working environment with improved work/life balances and improved efficiencies and productivity.

About CAN

CAN are an experienced Service Provider that provide service day in and day out to many Public Sector and commercial organisations. We take the hassle out of implementing and managing Voice and IT networks.

Our aspirations are that you spend more time running your own business and talking to your own customers than dealing with IT or telephone matters!

So would you like...

- A phone system that's easy to implement, change and manage?
- A phone system that will grow as you grow?
- Fully managed 24/7 with no extra call out charges?
- Disaster recovery built in?
- Flexible rental model with reduced total cost of ownership?
- Added benefits of seamless billing of all your BT lines, broadband and telephony?

... if so, then please call for more information and to discuss the potential it holds for you.
