

**CAN Managed Network Services**

**Introduction**

CAN's Managed network service offer secure, reliable and cost effective connections to both the internet and extensions to your LAN. A variety of access methods are available and our portfolio offers high-performance managed networks with the power to run applications and services that meet the demands expected from data networks. Every part of our service is supported by our detailed SLA's, with dedicated single points of contact with assurance of no call centre queuing systems and a no voice mail policy.

**Key Products**

**Supplier Choice**

When you select CAN you get a network partner that is not tied to any one Carrier providing you the freedom of choice to go with the most reliable and the best Carrier partner deals. All are world renowned offering European and Global reach with expertise in design, network management and outstanding standards of reliability and performance. All our partners are vetted for capability, support and financial stability. Some of these include:

**Why Choose CAN?**

CAN are a proven communication services provider experienced in delivering services day in and day out to many Commercial and Public Sector organisations demanding quality, cost effectiveness & longevity.

The UK market consistently asks for more supplier choice but without the hassle factors often associated in dealing with large carrier suppliers. Our key value add is our people, our SLA's for order processing and operational procedures and our award winning billing solutions. As a direct result we are able to handle multiple carrier's and focus on delivering to you their key strengths and network solutions without the need to micro-manage every aspect of service delivery. Thus leaving you free to manage your day to day business rather than your suppliers....

- Metropolitan Police Authority, City of London Police, Intercontinental Bank PLC
- Monmouthshire County Council, Sedgemoor District Council, Kofax UK PLC
